

A
PROJECT REPORT ON

Bus Booking System

SUBMITTED IN
PARTIAL FULFILLMENT OF
DIPLOMA IN ADVANCED COMPUTING (PG-DAC)

BY
Ms. Piyusha Patil
Ms. Disha Maniyar
Ms. Swarupa Patil
Mr. Sushil Saraf

UNDER THE GUIDENCE OF
Mr. Vrushabh Kumatale

AT
**SUNBEAM INSTITUTE OF INFORMATION TECHNOLOGY,
Karad**

**SUNBEAM INSTITUTE OF INFORMATION TECHNOLOGY,
Karad**

CERTIFICATE

This is to certify that the project

Bus Booking System

Has been submitted by

Ms.Disha Maniyar

In partial fulfillment of the requirement for the Course of **PG Diploma in
Advanced Computing (PG-DAC March 2024)** as prescribed by The
CDAC ACTS, PUNE.

Place: Karad

Date: 14-AUG-2024

Mr.Vrushabh Kumatale
Project Guide

Mr.Pratik Ninganur
Course Coordinator

ACKNOWLEDGEMENT

A project usually falls short of its expectation unless aided and guided by the right persons at the right time. We avail this opportunity to express our deep sense of gratitude towards **Mr. Prashant Lad (Center Coordinator, SIIT, Karad)** and **Mr. Pratik Ningnur (Course Coordinator, SIIT, Karad)**.

We are deeply indebted and grateful to them for their guidance, encouragement and deep concern for our project. Without their critical evaluation and suggestions at every stage of the project, this project could never have reached its present form.

Last but not the least we thank the entire faculty and the staff members of Sunbeam Institute of Information Technology, Karad for their support.

Ms.Disha Maniyar

**DAC March 24 Batch,
SIIT Karad**

1. INTRODUCTION TO PROJECT

The Bus Booking System project aims to address the challenges of traditional bus booking and management processes by providing a modern, user-friendly platform that facilitates a range of functionalities. This project report details the development and implementation of the Bus Booking System.

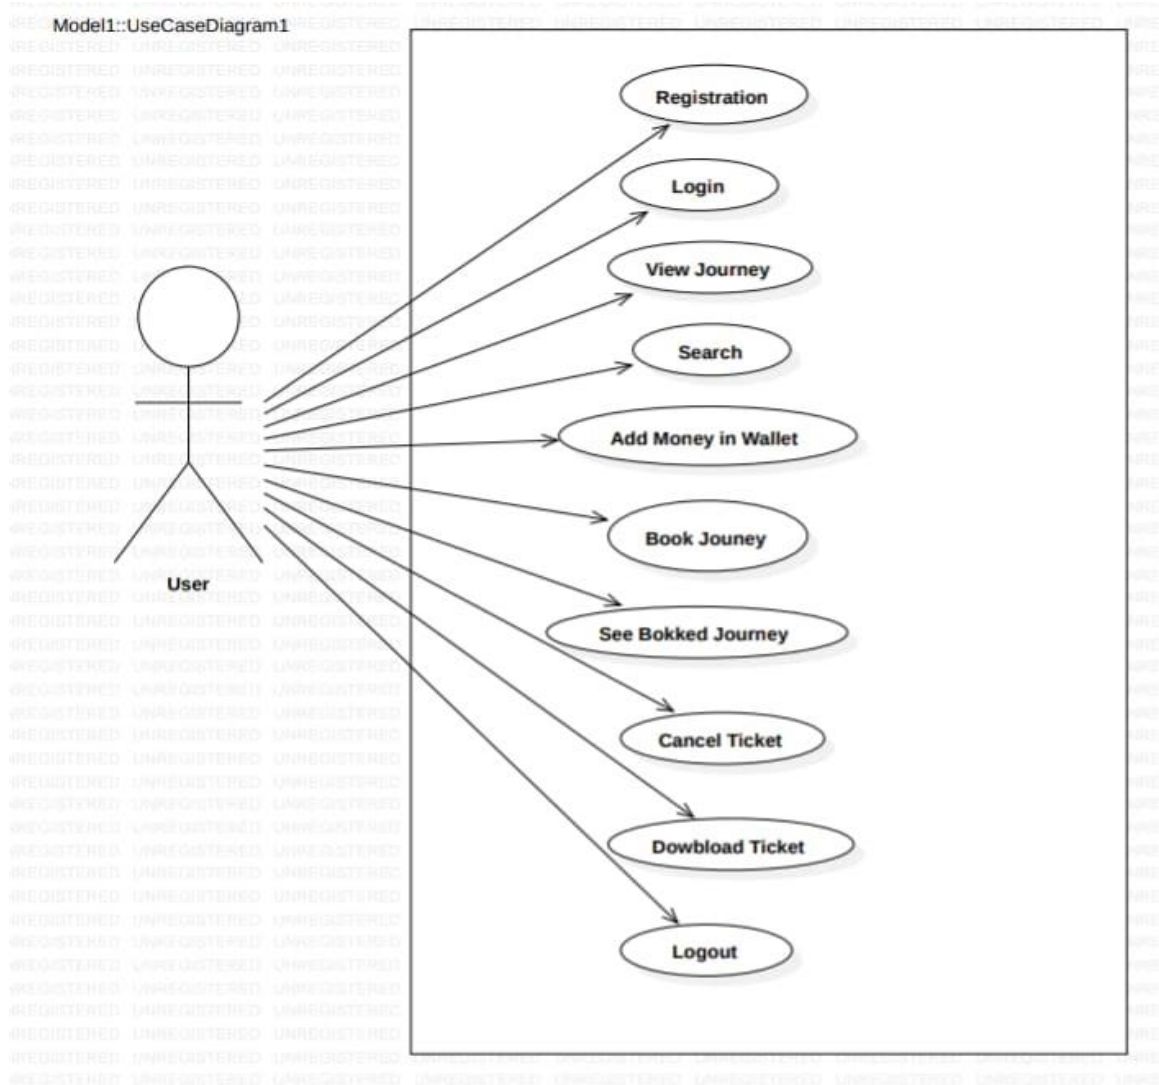

The system is designed to cater to both passengers and bus operators, offering a comprehensive suite of features that include:

User Registration and Authentication secure registration and login processes that safeguard user data and enhance privacy. Dynamic Bus and Route Management Tools for bus operators to manage buses, routes, and schedules, allowing for real-time updates and adjustments. Seat Selection and Booking An intuitive interface for passengers to view available seats and book their preferred seats in real-time. Payment Gateway Integration secure payment processing to facilitate smooth and hassle-free transactions for ticket purchases. Comprehensive Admin Dashboard a centralized dashboard for administrators to monitor system activities, manage user data, and generate reports.

By automating key processes and providing a comprehensive set of features, the system enhances the overall efficiency of the transportation sector. This project not only meets the immediate needs of bus operators and passengers but also sets the foundation for future enhancements and integrations with other digital services.

2.REQUIREMENTS

2.1 FUNCTIONAL REQUIREMENTS

2.1 User Account

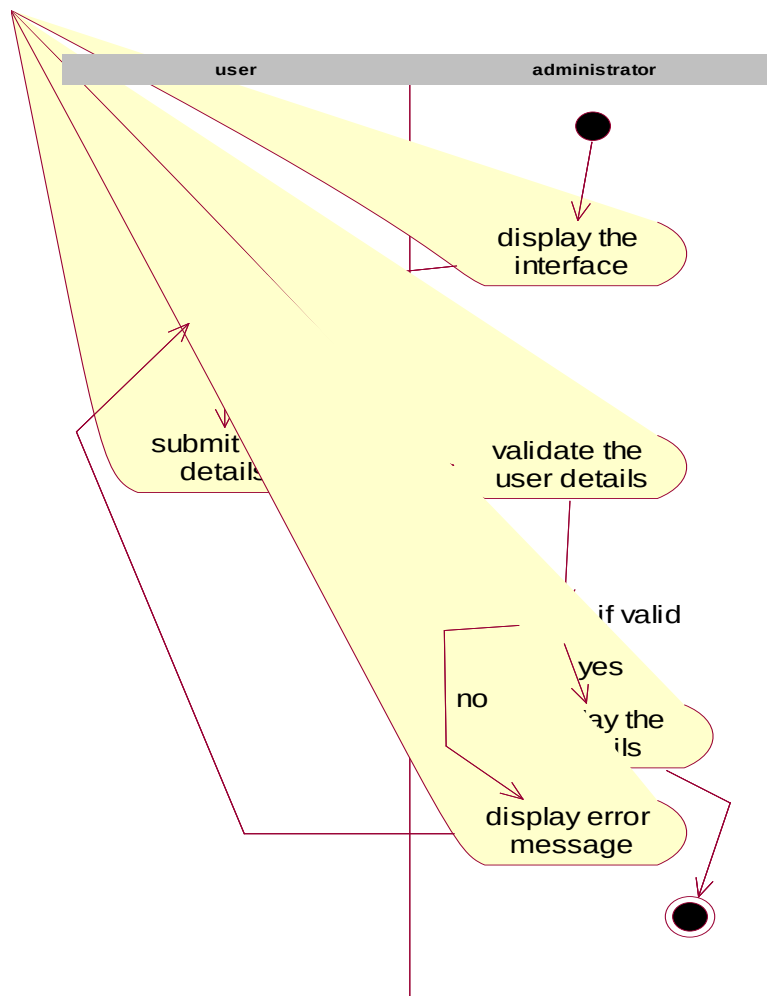

The passenger, who will henceforth be called the 'user', will be presented with 3 choices by the reservation system, as the first step in the interaction between them. A user can choose one of these and his choice would be governed by whether he is a guest or a registered user and whether he wants to check the availability of tickets or also block/buy them. The terms 'registered user' and 'guest' are described below.

A user who has traveled by the bus earlier would have been given a user id and a password. This 'personal information' would be henceforth referred to as 'profile'. Such

a user with a profile in DB-user shall be called a ‘registered user’. A registered user will be able to check the availability of tickets as well as block/buy a ticket by logging into the system. A guest can only check the availability of tickets and cannot block or buy tickets. But a registered user can also act as a guest if he only wants to check the availability of tickets. ‘Availability of tickets’ always refers to viewing the schedule for given days and the price of tickets.

2.2 Registration and creation of user profile

The system shall require a user to register, in order to carry out any transactions with it except for checking the availability of tickets. It will ask the user for the following information at the least – a user id, name, email Id, password, gender, contact, age, street, city, pin code. User will register after clicking on Register User button.

2.3 Search

Here we provided Search facility for any user to search Bus schedule without login into account. This will provide user an option for searching Available Bus. Either a registered user or a guest, the system shall request him to search by start date, end date, from bus stop and by to bus stop too. “From Bus Stop” is an Origin of journey and “To Bus Stop” is a Destination of journey. “Start Date” is a Departure Time and “End Date” is an Arrival Time.

There can be several Bus Scheduled between two Bus Stops and all of them will be listed for the particular date that the user wants to depart from the Origin bus stop. In case, the user has entered a range of dates, the system shall display all the Bus for all those dates in the range. There will be a Book Seat button in front of every row displayed the table of Bus searched.

The system will show available seats and price of seats and if passenger is not registered already then ask for registration first. One registered user can book for multiple seats. Total price will deduct from wallet of passenger.

2.4 Making Reservations/Blocking/Confirmation

After having taken the user, Checking Availability, The system will now ask the user if he wishes to block/buy the ticket. If yes, and

- a) if the user has been a guest, he will have to first register and become a registered user and then log onto the system.
- b) If the user is already a registered user, and if he has logged on already, he can block/buy the ticket, but if he has been acting as a guest, he will have to log on.

After Searching the scheduled bus click on the Button Book Seat. It will show Journey Ticket Availability. Shows Available Front, middle, back seats and prices of it. When click on Book Ticket it will ask for book journey by selecting Total Passenger and Journey Class Type.

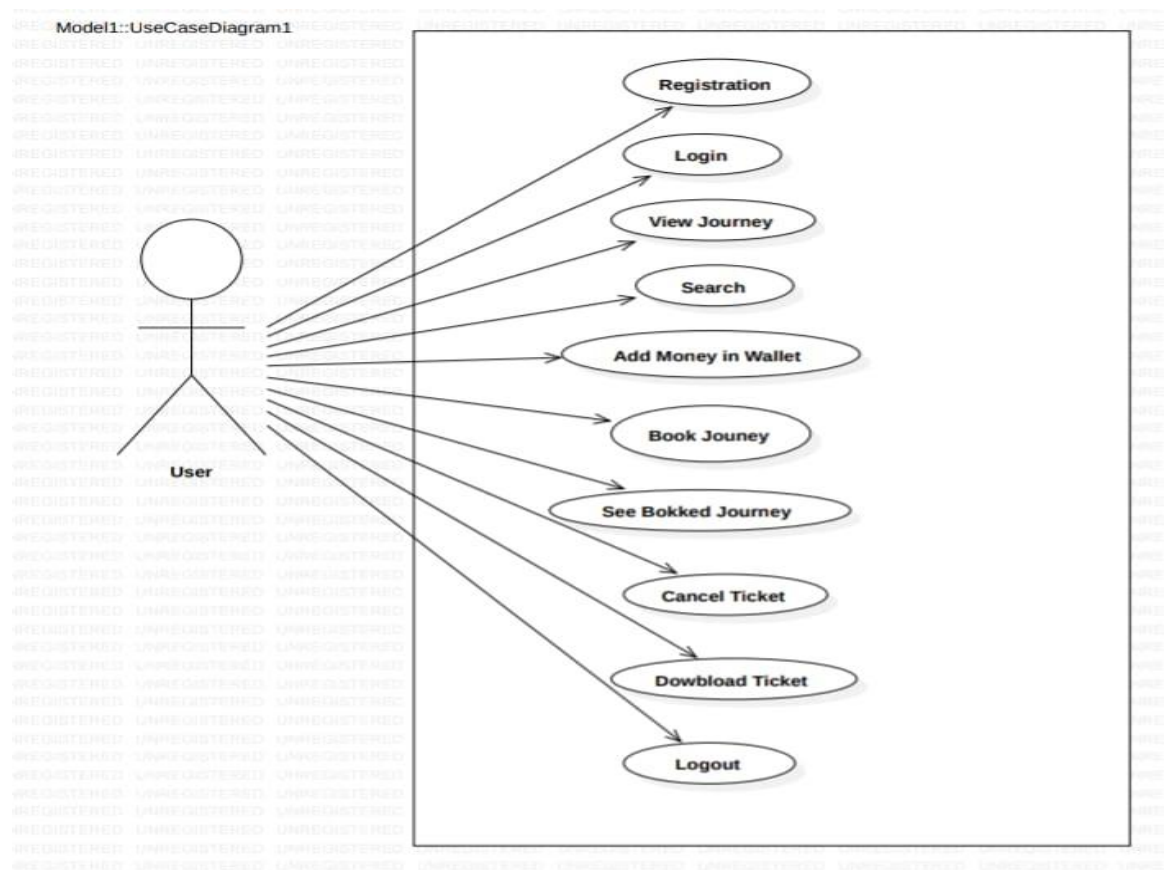

Having taken the input from the user the system shall now proceed to update the reservation database bus_reservation_system. It will decrement the number of available

seats on the particular Bus for the particular class by the number of travelers being represented by the user.

If seats are available then status of ticket is confirmed and if seats are not available it will show status as waiting. As soon as seat is available status change to confirmed. When user buys the ticket, the system will deduct the money from passenger wallet.

2.5 View Booking History

After Ticket Booking it will redirect to the page Booked Journeys. It will show Booking id, Journey Number, Bus, Bus Registration No., Departure Time, Arrival Time, Source BusStop, Destination BusStop, Journey Class, Seat Fare, Seat No, Booking Time, Status and Action. Status shown as confirmed, waiting, pending, available etc. You can download the ticket when ticket is confirmed and can Cancel the ticket when journey status is Scheduled.

Admin should be able to login, view journeys, add bus, add bus stop, view buses, view bus stops, add journey, view journey bookings and logout.

2.2 NON FUNCTIONAL REQUIREMENTS

2.2.1 Interface

Go to Appendix B for user interfaces

2.2.2 Performance

- **Number of Concurrent Users:**

ARS shall be able to handle at least 1000 transactions/inquiries per second

- **Booking of Tickets:**

The system is susceptible to any temporary server failure since it uses the strong feature of Struts 2 and Hibernate. Hence the examination will be continued even if the sever gets disconnected in between the examination.

2.2.3 Constraint

ARS shall be able to handle at least 1000 transactions/inquiries persecond

2.2.4 Other Requirements:

- **Hardware Interfaces**

The SPMS is expected to function on Intel PIII 900 MHz Processor equivalent or above, 128 MB RAM, 20 GB HDD.

- **Software Interfaces**

The SPMS shall work on MS Windows operating systems family (MS Windows 98, MS Windows NT Workstation, MS Windows 2000, MS Windows XP). It configures to work with Oracle database. This System works on Apache Tomcat server. It uses browser IE 5.0 & above. It uses IIS 5.0 server.

3. DESIGN

3.1 Database Design

The following table structures depict the database design.

Table1: User

Key Constraint	Type/ Column Name	Data Type	Length	Allow (1=Yes;0=No)	Null
3	id	int	4	0	
0	name	varchar	255	1	
0	email	varchar	255	1	
0	password	varchar	255	1	
0	roles	varchar	255	1	
0	gender	varchar	255	1	
0	contact	varchar	255	1	
0	street	varchar	255	1	
0	city	varchar	255	1	
0	pincode	varchar	255	1	
0	wallet_amount	decimal	255	1	
0	status	varchar	255	1	

Table2:Bus

Key Constraint	Type/ Column Name	Data Type	Length	Allow (1=Yes;0=No)	Null
3	id	int	4	0	
0	name	varchar	255	1	
0	description	varchar	255	1	
0	registration_number	varchar	255	1	
0	total_seat	int	4	0	
0	back_seats	int	4	0	
0	middle_seats	int	4	0	
0	front_seats	int	4	0	

0	status	varchar	255	1
---	--------	---------	-----	---

Table3:BusSeatNo

Key Type/ Constraint	Column Name	Data Type	Length	Allow Null (1=Yes;0=No)
3	id	int	4	0
0	bus_id	int	4	1
0	seat_no	varchar	255	1

Table4:BusStop

Key Type/ Constraint	Column Name	Data Type	Length	Allow Null (1=Yes;0=No)
3	id	int	4	0
0	name	varchar	255	1
0	location	varchar	255	1
0	code	varchar	255	1
0	address	varchar	255	1

Table5:Journey

Key Type/ Constraint	Column Name	Data Type	Length	Allow Null (1=Yes;0=No)
3	id	int	4	0
0	journey_number	varchar	255	1
0	departure_time	varchar	255	1
0	arrival_time	varchar	255	1
0	status	varchar	255	1
0	departure_busstop_id	int	4	1
0	arrival_busstop_id	int	4	1
0	bus_id	int	4	1
0	back_seat_fare	decimal	38	1

0	middle_seat_fare	decimal	38	1
0	front_seat_fare	decimal	38	1
0	total_seat	int	4	0
0	back_seats	int	4	0
0	middle_seats	int	4	0
0	front_seats	int	4	0

Table6:JourneyBooking

Key Type/ Constraint	Column Name	Data Type	Length	Allow Null (1=Yes;0=No)
3	id	int	4	0
0	booking_id	varchar	255	1
0	booking_time	varchar	255	1
0	status	varchar	255	1
0	passenger_id	int	4	1
0	journey_id	int	4	1
0	journey_class	varchar	255	1
0	bus_seat_no	int	4	1

4. CODING STANDARDS IMPLEMENTED

Naming and Capitalization

Below summarize the naming recommendations for identifiers in Pascal casing is used mainly (i.e. capitalize first letter of each word) with camel casing (capitalize each word except for the first one) being used in certain circumstances.

Identifier	Case	Examples	Additional Notes
Class	Pascal	Bus, Journey, User, BusStop, Journey Booking	Class names should be based on "objects" or "real things" and should generally be nouns . No ‘_’ signs allowed. Do not use type prefixes like ‘C’ for class.
Method	Camel	getId, getAll, updateUser	Methods should use verbs or verb phrases.
Parameter	Camel	name, totalSeat, arrivalTime, walletAmount	Use descriptive parameter names. Parameter names should be descriptive enough that the name of the parameter and its type can be used to determine its meaning in most scenarios.
Interface	Pascal with "I" prefix	UserService, BusService	Do not use the ‘_’ sign
Exception Class	Pascal with "Exception" suffix	GlobalException,	

Comments

- Comment each type, each non-public type member, and each region declaration.
- Use end-line comments only on variable declaration lines. End-line comments are comments that follow code on a single line.
- Separate comments from comment delimiters (apostrophe) or // with one space.
- Begin the comment text with an uppercase letter.
- End the comment with a period.
- Explain the code; do not repeat it.

5. TEST REPORT

Another group called Linux did the testing and the report of the testing is given hereunder.

GENERAL TESTING:

SR-NO	TEST CASE	EXPECTED RESULT	ACTUAL RESULT	ERROR MESSAGE
1	Register Page	Redirected to Next page	OK	Nothing
2	Login Page	Pop-up will come	Ok	Invalid email or password
3	Add Bus, Bus stops	Add into table	Ok	Nothing
4	Search Bus by Bus stop, Time	Gives all Bus details	Ok	Nothing
5	Booking Ticket	All the fields should be filled for submission	Ok	Nothing
6	Checking login or not	User is logged in or not	Ok	Nothing
7	Add person details for tickets	Add information according to no of seats allocated	Ok	Nothing
8	Go to ticket page	Set added information about person	Ok	Nothing
9	Ticket Availability	Show Ticket Availability count	Ok	Nothing
10	Add information in booking table	Save this all data into booking table	Ok	Nothing
11	status	Seats are not available then status is waiting	Ok	Nothing
12	Transaction	On back it should be reverted to previous page	Ok	Nothing
13	Cancel Ticket	Cancel the ticket and payment get back in wallet of passenger	Ok	Nothing
14	Logout	It will logout from user profile.	Ok	Nothing
STATIC TESTING				
SR-NO	Deviation	Program		
1	Commenting not followed	All Web Application		

6. PROJECT MANAGEMENT RELATED STATISTICS

DATE	WORK PERFORMED	SLC Phase	Additional Notes
April 27,2024	Project Allotment and User Requirements Gathering	Feasibility Study	Our team met the client Mr. Nitinkudale (CEO, SIIT Pune) to know his requirements.
May 4,2024	Initial SRS Document Validation And Team Structure Decided	Requirement Analysis (Elicitation)	The initial SRS was presented to the client to understand his requirements better
May 10,2024	Designing the use-cases, Class Diagram, Collaboration Diagram, E-R Diagram and User Interfaces	Requirement Analysis & Design Phase	Database Design completed
May 11,2024	Business Logic Component design Started	Design Phase	-----
May 20,2024	Coding Phase Started	Coding Phase	70% of Class Library implemented.
June 5 ,2024	Implementation of Web Application and Window Application Started	Coding Phase	Class Library Development going on.
June 10 ,2024	Off	Off	Off
July 19,2024	Implementation of Web Application and Window Application Continued	Coding Phase and Unit Testing	Class Library Modified as per the need.
July 24, 2024	Implementation of Web Application and Window Application Continued	Coding Phase and Unit Testing	--

Bus Booking System

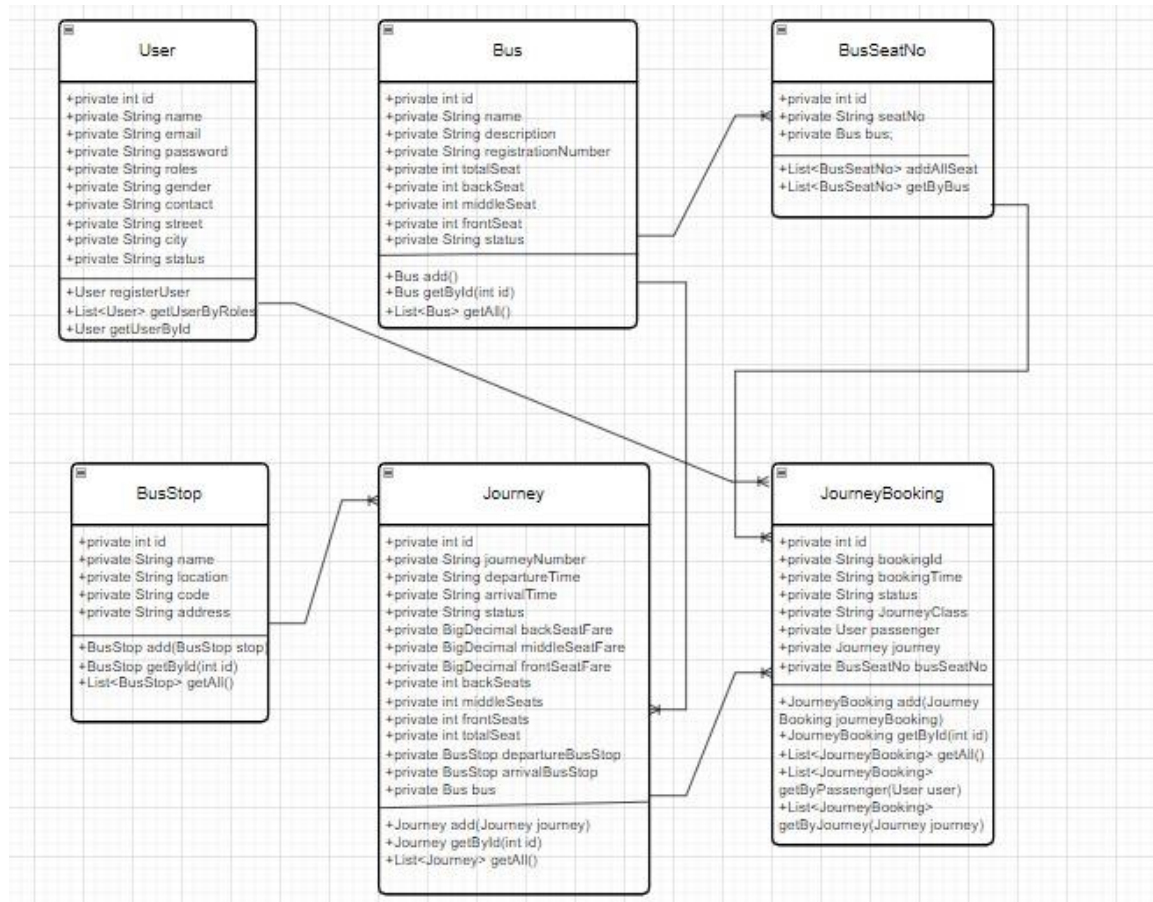

Aug 8, 2024	After Ensuring Proper Functioning the Required Validations were Implemented	Coding Phase and Unit Testing	Module Integration was done by the Project Manager
Aug10,2024	The Project was Tested by the respective Team Leaders and the Project Manager	Testing Phase (Module Testing)	--
Aug 11,2024	The Project was Submitted to Other Project Leader of Other Project Group For Testing	Testing Phase (Acceptance Testing)	The Project of Other Team was Taken up by the Team for Testing
Aug 12,2024	The Errors Found were Removed	Debugging	The Project was complete for submission
Aug 14, 2024	Final Submission of Project

Welcome to Bus Reservation System

Welcome to our Bus Reservation System, where effortless travel planning and exciting journeys converge. Begin your adventure of convenience as you navigate our intuitive platform, discovering a plethora of routes, destinations, and seating choices. Whether you're a frequent commuter or a first-time traveler, our system empowers you to book your bus tickets seamlessly, guaranteeing a stress-free experience from departure to arrival.

As you enter our digital hub, your travel aspirations draw nearer. Join us in revolutionizing the bus booking experience, transforming every journey into a remarkable destination of its own.

[Get Started](#)

Real-time Availability and Instant Confirmation

Indulge in unparalleled convenience with our real-time availability and instant confirmation feature. Bid farewell to uncertainty and waiting – our state-of-the-art technology guarantees you access to up-to-the-minute bus availability and confirmation, empowering you to solidify your travel arrangements promptly. With just a few clicks, explore bus options, choose your desired seating, and receive immediate confirmation, propelling you towards your next excursion without hesitation.

Furthermore, our system provides instant confirmation for bus bookings. Upon completing their reservation, users promptly receive an email or notification confirming their booking, ensuring their tickets are secured and prepared for travel. This eradicates any doubts and enables customers to proceed confidently with their travel arrangements.

ABOUT US

Here at J013 bus booking system, we're committed to providing you with a smooth and hassle-free bus booking experience. We know how important convenience, dependability, and affordability are to your travels, and we're here to deliver exactly that.

Our Mission

Our mission is to connect passengers with a wide range of bus operators, offering a simple and efficient booking process. Whether you're planning a long-distance trip or a quick commute, we strive to be your go-to platform for all your bus travel needs.

What We Offer

Wide Selection:

Choose from a vast network of bus operators across multiple routes and destinations. We partner with trusted operators to ensure you have access to a variety of options, from luxury coaches to budget-friendly buses.

User-Friendly Interface:

Our platform is designed with you in mind, offering an easy-to-navigate interface that makes booking your next trip a breeze. Simply search, compare, and book your tickets in just a few clicks.

Secure Payments:

We prioritize your security. Our platform supports multiple payment methods, ensuring your transactions are safe and secure.

6.CONCLUSION:

In conclusion, the Bus Booking System represents a significant advancement in streamlining the process of reserving bus tickets. By leveraging modern technology, it provides users with a convenient, efficient, and user-friendly platform to book tickets from anywhere at any time. The system enhances customer satisfaction by offering real-time seat availability, secure payment options, and instant confirmation, thereby eliminating the hassles associated with traditional booking methods.

Additionally, it benefits operators by optimizing seat management, reducing manual errors, and enabling better data tracking for operational insights. As the transportation industry continues to evolve, the Bus Booking System stands as a vital tool for ensuring a seamless and reliable travel experience.
